First Editions® Goldspur Amur Chokecherry

A unique, smaller flowering cherry tree with year round interest.

St. Paul, Minn. (Spring 2013) – If you thought you didn't have space in your yard for a cherry tree, think again. First Editions® Goldspur Amur Chokecherry grows to only about 15-feet, about half the size of a typical cherry tree. This compact tree holds its upright, oval shape and offers year-round interest.

In spring, First Editions Goldspur shows off white flowers that turn to tiny black fruit in the summer. Through the winter, this tree sheds its golden bark, creating an attractive look throughout the snowy season.

First Editions® Goldspur Amur Chokecherry

Prunus maackii 'Jefspur' PP19,665

Location: Full sun

Zone: 2-6

Height: 10- to 15-feet

Width: 6- to 9-feet

Flower: Creamy white

Foliage: Green

Look for First Editions Goldspur Amur Chokecherry in the purple pots at garden centers this spring.
