

Although the species tend to flower biennially, Snowdance™ flowers well annually and begins flowering at an earlier age than the species. It has exceptionally heavy bloom with large, fragrant, creamy white flower clusters in June. Snowdance™ grows as wide as it is tall with attractive, shelved branching. A pest-and-disease-free lilac tree, it is ideal for residential and park use and is equally attractive as a specimen as it is in group plantings. Selected by Rod Bailey for its remarkably heavy bloom.

BENEFITS OF A 6' WHIP GRADE

- Gives you flexibility to create a head that fits your needs
- Whips have higher survival rates in difficult sites
- Perfect for lining out in the field

HEIGHT 18'	WIDTH 20'	ZONE 3-7	EXPOSURE Full sun
