

This McKay Nursery introduction was selected for its uniform branching habit and upright narrow form. This is an excellent nursery tree and makes up well as a young B&B tree. Use it in the landscape for boulevards and smaller yards where space is at a premium, but shade is required. The distinctive bark is silvery gray especially when the plant is immature and is very attractive. American Sentry[®] is the most resistant linden to Japanese beetle.

BENEFITS OF A 1" AND 1 ¼"

- Last year to order 'American Sentry'!
- Nearly finished plant for municipalities
- Quick turnaround in a #15 or larger container

HEIGHT	WIDTH	ZONE	EXPOSURE
