

# BAILEY®

GROWING WHAT'S NEXT®

## RETAIL SUCCESS GUIDE

# WELCOME

## WE'RE HERE TO HELP YOU GROW YOUR GARDEN CENTER

Today, retail success takes more than great plants. It requires the right product, at the right time, presented in a way that quickly and consistently converts shoppers into buyers.

At Bailey, we focus on helping you do exactly that.

From retail-ready plants and recognized consumer brands to seasonal programs designed around key selling windows, our offerings are meant to help you turn product faster, reduce labor, and make better use of your sales floor.

We understand the realities of running a garden center: tight labor, narrow timing windows, and limited space to generate sales. That is why our programs are designed to arrive ready to merchandise, create immediate visual impact, and support impulse sales and return shoppers.

Bailey isn't just a supplier. We're a partner focused on helping you drive results where it matters most: in your store.

# WHAT TODAY'S SHOPPERS ARE LOOKING FOR

Consumers are not just shopping for plants. They're looking for solutions that fit their lifestyle and reflect their personal style.

Smaller-space plants, lower-maintenance options, pollinator-friendly varieties, edible plants, and those that bring seasonal color are all driving retail sales. At the same time, interest in native plants and native selections continues to grow, along with demand for drought-tolerant options that require less water and upkeep. But turning these trends into a clear, shoppable assortment isn't always easy.

**That's where Bailey can help. We turn these trends into retail-ready programs that help you respond to demand, simplify assortment planning, and keep product moving.**

## THE RIGHT PLANTS WHEN YOU NEED THEM

Our finished container program includes a broad mix of retail-ready, landscape-tested shrubs, trees, and perennials, including leading brands like Endless Summer® Hydrangeas, First Editions® Shrubs & Trees, Easy Elegance® Roses, and Proven Winners® ColorChoice®.

Shoppers buy with their eyes, which makes fresh, high-impact products critical on your sales floor. By staging crops and ready dates to coincide with your seasonal peaks, we can help you keep your plant inventory looking its best when you need it the most. Supported by multiple ship sites, the program gives you more flexibility to keep benches stocked with the right product at the right time.

This diversity gives you access to top-selling hydrangeas like:

- Endless Summer® Summer Crush® Reblooming Hydrangea
- First Editions® FlowerFull® Smooth Hydrangea
- First Editions® Little Hottie® Panicle Hydrangea

Plus access to dependable landscape staples like:

- Karl Foerster Feather Reed Grass
- First Editions® Little Devil™ Ninebark
- First Editions® Iceberg Alley® Sageleaf Willow

# BEST SELLING PLANTS - TOP 20

These varieties were the top in 2025, giving you a starting point for what consumers are telling you to have on your shelves. Use this as a checklist to start building your orders for seasonal displays!

# CONTAINER PROGRAM: THE BEST IN THE BUSINESS

Our container program delivers high-quality, retail-ready trees and shrubs designed to perform on your sales floor. From shade, ornamental, and fruit trees in #5 to #25 sizes to a broad mix of consumer-requested shrubs, our assortment is backed by more than a century of Bailey production experience.

Bailey plants are handled with care from liner to finished product, which allows us to be selective from the start. In the field, trees are trained and managed for strong structure, and shrubs are grown for consistency and performance. Each plant is potted in our in-house mix, pruned, rooted in, and proactively treated for pests and disease, arriving ready for your sales floor.

## CONVENIENT CONTAINER SHIPPING

Container trees ship from Minnesota and Oregon, with shrubs available from those locations plus Illinois, giving you greater flexibility and easier regional access.

## POT-IN-POT TREE PRODUCTION

Our pot-in-pot system provides greater stability by preventing tipping and protecting roots from temperature swings. Targeted irrigation reduces waste and limits foliar disease, resulting in more consistent, better-performing trees.

## EXPANDED PERENNIAL OFFERINGS

Bailey continues to expand its perennial program, offering a wider variety of selections ranging from new introductions to the classic garden center staples.

As we continue to add more diversity, we've also expanded our shipping network. While the largest assortment ships from Minnesota, perennials are now also available from our Oregon and Illinois ship sites.

# SEASONAL PROGRAMS BUILT WITH YOU IN MIND

Our seasonal programs are designed around key selling windows, practical sizes, and assortments that help you respond to shopper demand. Whether you need blooming product for spring traffic or a format that encourages multi-unit purchases, these programs are built to support better turns with less handling.

## BUD & BLOOM PROGRAM: AUGMENT EARLY-SEASON SALES

Timing is critical around Mother's Day and can have a huge impact on your spring sales. Our Bud & Bloom program helps you bring in blooming product when demand is high, with retail-ready roses, clematis, and hydrangeas from brands your customers already know and trust.

Bud & Bloom is designed to help you capture high-value impulse sales when timing matters most. We pair the strength of our consumer brands in hydrangeas and roses with eye-catching clematis, all forced into bloom so product arrives primed and ready for early spring sales.

Shipments land in a focused 3-4 week window from mid-April through Mother's Day, giving you a reliable way to bring color to the bench and turn peak traffic into stronger sell-through.

### THE MOTHER'S DAY TRIFECTA

Bud & Bloom plants were selected for their broad appeal and strong impulse appeal. All products ship from Cottage Grove, Minnesota as 2-gallon shrubs.

- **Hydrangeas:** Top-selling varieties from the Endless Summer® Hydrangeas and First Editions® Shrubs & Trees collections, including DreamCloud® and Summer Crush® Reblooming Hydrangeas, Eclipse® Bigleaf Hydrangea, and FlowerFull® Smooth Hydrangea
- **Roses:** Select varieties of Easy Elegance® Roses and First Editions® Shrubs & Trees
- **Clematis:** A gorgeous handful of varieties handpicked for long shelf life and visual interest

# PLANT IT. PICK IT. LOVE IT.

Plant & Pick™ is a new packaged retail program designed to make small fruits easier to sell. With eye-catching branding and a more approachable container size, it encourages customers to buy and to buy more than one. That shift shows up quickly at the register.

In retail trials, shoppers purchased **80% more raspberries** and **25% more blueberries** on average compared to larger containers. It's a simple change that drives meaningful lift in unit sales.

Plant & Pick™ small fruits are grown in a branded JumpStarts® 5.5 container, slightly smaller than a 1-gallon pot, and packed eight to a tray. This makes it easy for customers to pick up multiple plants while keeping stocking, merchandising, and handling simple for your team.

## PLANT & PICK™ SMALL FRUIT OFFERINGS

Plant & Pick™ includes a mix of top-selling edibles like grapes, blueberries, raspberries, strawberries, honeyberries, asparagus, and rhubarb, giving you a well-rounded assortment for customers looking to grow their own.

Now available from Oregon, Illinois, and Minnesota. The program ships spring through May.

## SHIP SITES THAT SUPPORT YOUR BUYING STRATEGY

Strategically located across the United States, Bailey supports your business from multiple ship sites to help optimize seasonality, freight, and product mix. With locations in Minnesota, Illinois, and Oregon, you can source product based on timing, crop readiness, and regional demand.

- **Minnesota:** Finished containers (shrubs and trees), Bud & Bloom, Plant & Pick™
- **Illinois:** Finished containers (shrubs only), Plant & Pick™
- **Oregon:** Finished containers (shrubs and trees), Plant & Pick™

Each location offers distinct advantages based on climate and staging. Leveraging availability across sites allows you to build a more diverse assortment and bring in product at the right time for your market. This approach helps you stay in sync with regional demand while reducing risk throughout the season.

### PLANNING FOR THE BEST DISPLAYS

To make ordering easier, we offer planning tools that help you align with peak timing, manage product flow, and maintain strong color on your sales floor throughout the season.

Scan the QR code for a seasonal color chart of key First Editions® varieties, or reference the adjacent chart for typical ready dates for a selection of most-requested species. Use these tools as a starting point when building orders and planning ongoing shipments.

# BAILEY BRANDS CONSUMERS TRUST GENETICS THAT PERFORM

Success at retail comes down to more than just what's new. While new varieties attract attention, they have to perform in the landscape to build trust and keep customers coming back. At Bailey, we take that seriously, only bringing you plants that deliver long-term success for your garden center.

We do this by testing new varieties across multiple climates and production systems to ensure consistency, durability, and strong retail appeal. Whether it's a new cultivar from leading breeding partners around the world or from our own programs in Minnesota and at Bailey Innovations™ in Georgia, every introduction has to prove itself before earning a place in our catalog.

Before a plant makes it into one of Bailey's consumer brands, it undergoes additional trialing with universities, public gardens, or growing partners across North America to validate our internal data. The result: confidence for you and your customers. Only the best performers make it to your shelves.

First Editions® FlowerFull® Smooth Hydrangea (left) in a bareroot field trial next to an industry standard (right), confirming its genetic improvements for improved flower count, stronger stems, and superior in-ground performance.

**Endless  
Summer®**  
hydrangeas

## LEADING THE CATEGORY THAT CONTINUES TO GROW

In a crowded hydrangea category, Endless Summer® continues to set itself apart. As the original reblooming hydrangea brand, it helped define customer expectations and continues to deliver the qualities shoppers value most.

Recent introductions like Pop Star®, Summer Crush®, and DreamCloud® build on that momentum. Each hydrangea in this collection adds bold color, strong visual impact and reliable reblooming performances in the landscape. For you, that means strong brand recognition, greater customer confidence, and a product that is easier to sell.

The result is a hydrangea brand that customers know, trust, and ask for by name.

# easy elegance®

ROSES YOU CAN GROW™

## EASY TO LOVE. EASY TO GROW.

Easy Elegance® roses deliver the classic rose look shoppers want in a collection that is easier to maintain and easier to sell. Improved disease resistance and cleaner foliage help the plants hold up on the bench through the summer, reducing upkeep while keeping the display attractive.

Available in a range of sizes, shapes, and colors, Easy Elegance® makes it easier to offer options that fit a variety of customer tastes and landscape uses. With hardiness, durability, and strong garden performance built in, both you and your customers can call them an easy win.

# CONSUMER MARKETING THAT DRIVES STORE TRAFFIC

Reaching today's consumer means showing up where they already go for inspiration and information. Through our consumer brands, we connect with shoppers across a coordinated mix of media channels to build awareness, trust, and purchase intent before they ever reach your store.

## PAID ADVERTISING CREATING CONSUMER AWARENESS

Our paid media strategy puts our consumer brands in front of shoppers across the platforms they engage with every day. This includes national lifestyle publications like Better Homes & Gardens, Southern Living, and Magnolia, along with digital and social placements that extend reach and reinforce awareness.

We take a full-funnel approach, leveraging Hulu and other streaming video platforms, paid social campaigns, Google search, and targeted display advertising on relevant websites consumers are already browsing.

Together, this coordinated ecosystem keeps our brands, and the plants you carry, top of mind throughout the buying journey, driving more informed, ready-to-buy consumers into your stores.

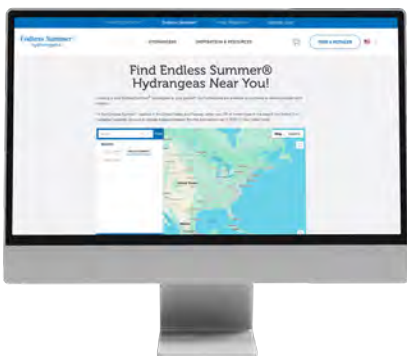

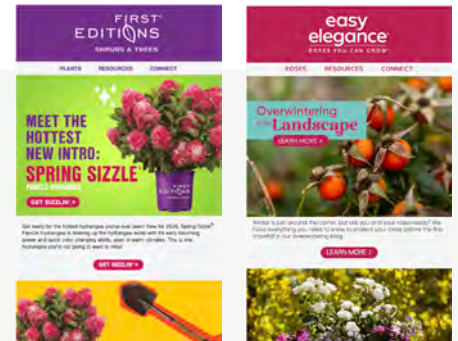

## SOCIAL MEDIA MAINTAINING ENGAGEMENT AND FAMILIARITY

Our consumer brands maintain an active social media presence that keeps us directly connected to today's shopper. This allows for real-time engagement, helping us stay in tune with consumer preferences while delivering content that inspires, educates, and drives traffic to garden centers.

We also partner with trusted garden and lifestyle creators to extend our reach and bring authentic voices to the conversation. These collaborations introduce our plants to new audiences, build credibility, and create stronger connections with shoppers.

## NEWSLETTERS STAYING TOP OF MIND FOR CONSUMERS

Monthly newsletters for our consumer brands keep seasonal inspiration and care information in front of shoppers. That ongoing connection helps keep the brands top of mind and supports demand for the plants you sell.

## WEB SUPPORT TURNING RESEARCH TO STORE TRAFFIC

Consumer websites provide a deeper destination for home gardeners to explore our brands. Blogs, videos, plant pairing inspiration, detailed variety information, and **Find-A-Retailer** tools help guide shoppers from inspiration to purchase.

## PR EFFORTS BUILD CREDIBILITY THROUGH THIRD-PARTY VISIBILITY

Editorial coverage in print and digital publications your shoppers already read builds awareness, reinforces credibility, and encourages consumers to ask for our varieties by name. We've built strong relationships with editors at national, regional, and local outlets, earning placements in trusted publications like Better Homes & Gardens, HGTV Magazine, and The New York Times, helping generate interest and guide more shoppers to your garden center.

## HERE TO SUPPORT YOUR SUCCESS

We've built awareness and demand, so now it's about execution. Bailey provides the tools, systems, and resources to help you receive product efficiently, merchandise with confidence, and convert shopper interest into sales.

Online, you will find plant education, tips for selling branded plants like Endless Summer® Hydrangeas, videos, and professional photography available to use in bench cards and other retail materials. It is all there to help you plan, merchandise, and sell with greater ease through the Resources page at [BaileyNurseries.com](https://BaileyNurseries.com).

### SAFE AND EFFICIENT RACKING SYSTEM

Our racking system is designed to make receiving, unloading, and staging fast and efficient, especially during peak season. With minimal handling required, it saves time, reduces damage, and gets product to the sales floor quickly and ready to sell.

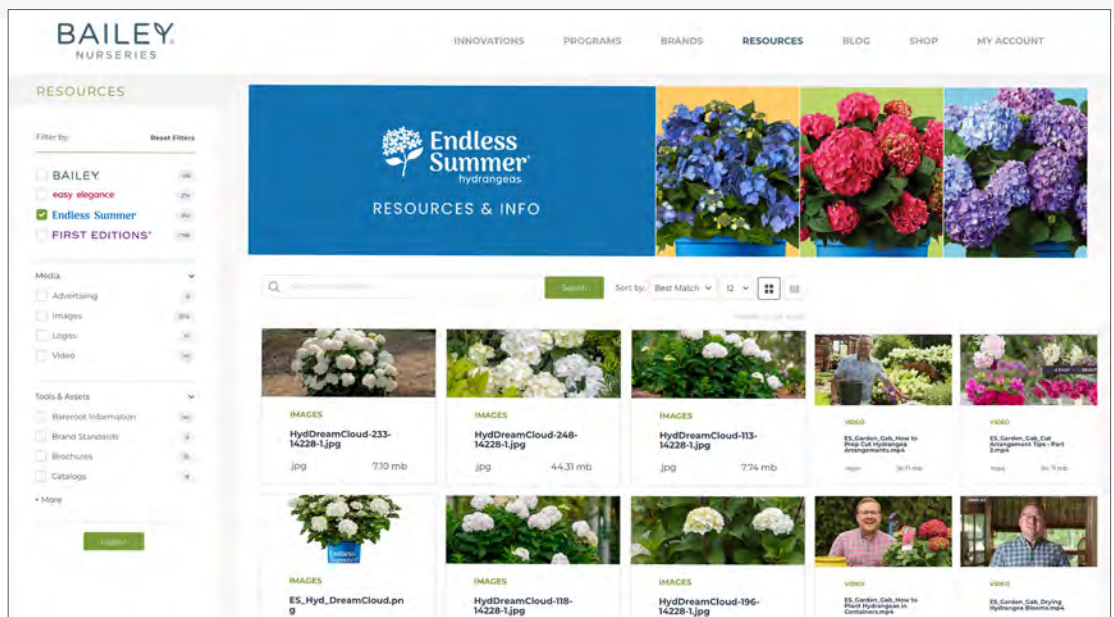

## SIGNAGE TO SUPPORT SALES & EDUCATE SHOPPERS

Our merchandising tools are designed to make shopping easier. Eye-catching signage, bench cards, and display solutions help guide shoppers, highlight key features, and build confidence, turning browsing into buying.

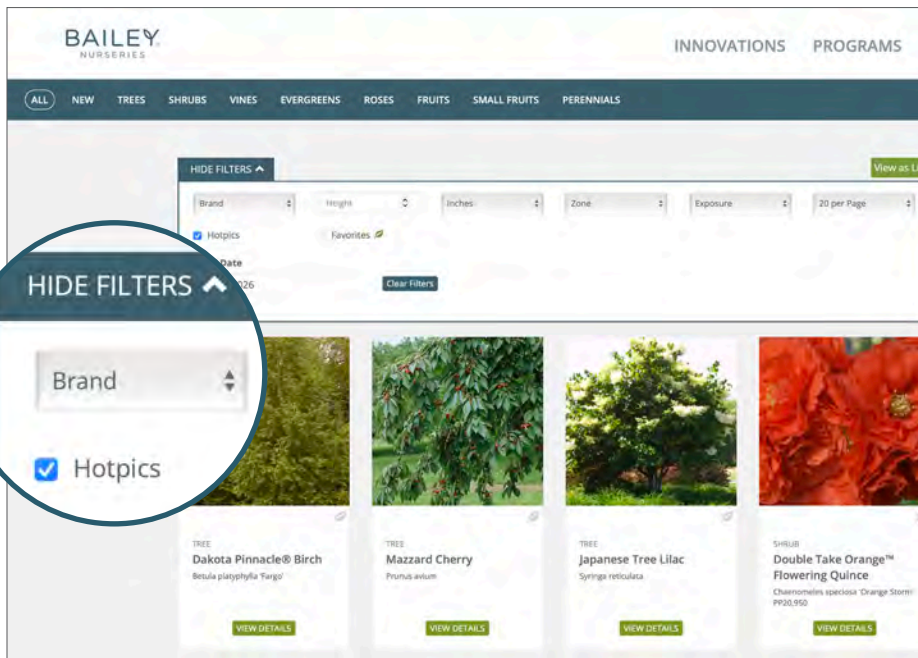

## RESOURCES YOUR TEAM CAN USE EVERY DAY

Our online resource center gives your team access to plant information, care tips, merchandising tools, photography, and videos. Whether planning displays or assisting customers on the sales floor, these tools help your team sell with confidence.

# PLAN WITH CONFIDENCE. BUY WITH CLARITY.

Knowing what you're buying and when it will be ready makes all the difference. Our online tools give you real-time visibility into crop status so you can plan assortments, schedule deliveries, and buy with confidence during the season.

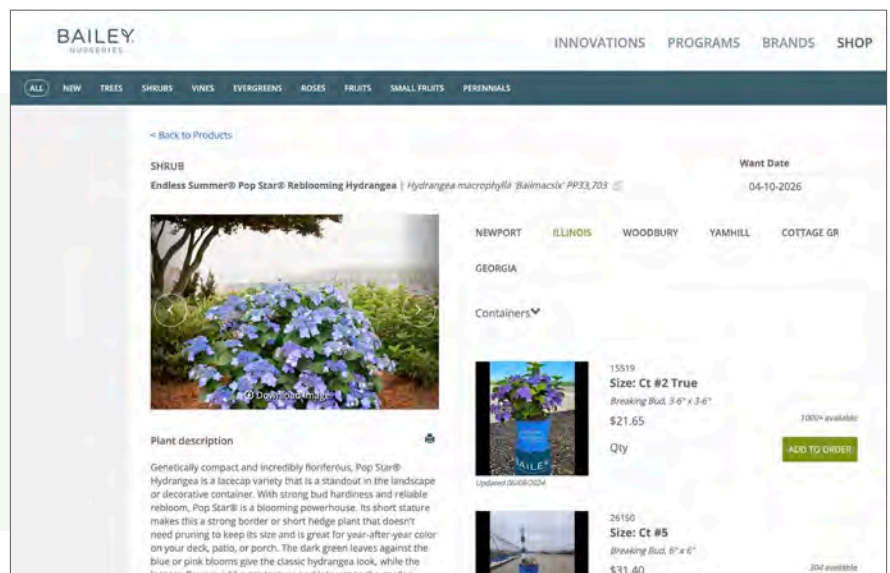

## HOTPICS: HIGHLIGHTING WHAT'S SELLING NOW

Hotpics spotlight crops at a stage that's ready to ship and ready for retail. It's a quick way to identify product that will arrive looking its best, positioned to drive impulse sales the moment it hits your sales floor.

## PRODUCT STATUS: SEE WHAT'S READY

Product status photos, updated weekly on the Bailey Shop, show how crops look in our fields in real time. It's a simple way to evaluate the plants' stage, plan purchases, and align timing with your sales windows.

PRE-PRICE TAG PROGRAM  
**MORE TIME STOCKING,  
LESS TIME TAGGING**

Save time and labor with our pre-price tag program. Products arrive with your custom retail pricing already applied and ready to sell, with barcode options that integrate seamlessly with your Point of Sale system.

Tags can be updated for mid-season price changes, giving you flexibility while reducing handling. This means fewer steps, faster setup, and more time focused on selling.

# WE'RE HERE FOR YOU

We are grateful to partner with you and look forward to continuing a long-standing relationship. Please feel free to connect with your Territory Sales Representative, Inside Sales Representative (ISR), or Sales Manager any time to discuss how we can support you and your business.
