

QUEEN BEE[®] CHASTETREE

Vitex agnus-castus 'Bailtexthree' PP35,259

USDA Hardiness Zone: 5-9

AHS Heat Zone: 9

Height: 5-6'

Width: 7-9'

Exposure: Full Sun

Shape: Upright, Arching

Long-lasting blooms and improved flower power make this shrub a true standout. Vibrant lavender flowers appear in mid-June and continue throughout the summer. The first round of flowers encourages a strong rebloom, which is ideal for scheduling production cycles. Queen Bee[®] exhibits impressive drought, heat and cold tolerance compared to similar varieties. With its larger size, this pollinator magnet creates a beautiful and colorful hedge or focal point.
